BHI App User Guide

Balanced Health Institute - Health Education Platform

Important Disclaimer

This is an educational tool, not a medical diagnostic service. Always consult your healthcare provider for medical advice.

Table of Contents

1. Getting Started
2. Navigation
3. Home (Dashboard)
4. Resources
5. Lab Results
6. Profile
7. Admin Section
8. Data Storage

1. Getting Started

First Launch

When you first open the app, you'll see a welcome screen that explains:

- The purpose of the platform
- How to use the basic features
- An important disclaimer about the educational nature of the tool

Click **"Get Started"** to enter the main application, or **"Skip Introduction"** to bypass the welcome screen.

Dark/Light Mode

A theme toggle button (sun/moon icon) appears in the top-right corner of every screen. Click it to switch between light and dark modes. Your preference is saved automatically.

2. Navigation

The app has five main sections accessible from the top navigation bar:

Tab	Purpose
Home	Dashboard with quick stats and personalized recommendations
Resources	Browse all health education materials
Lab Results	Enter and view your lab test results

Tab	Purpose
Profile	Manage your account settings and preferences
Admin	Content management (admin users only)

3. Home (Dashboard)

The dashboard provides an overview of your activity:

Stats Cards

- **Bookmarked Resources** - Number of resources you've saved
- **Lab Results** - Number of lab results you've entered
- **Health Insights** - Tags derived from your lab results
- **Recommendations** - Resources matched to your health profile

Personalized Recommendations

If you've entered lab results, the dashboard shows resources specifically matched to your health insights. These are prioritized based on how many of your tags match the resource.

Quick Actions

Shortcut buttons to:

- Log new lab results
- Browse resources
- Edit your profile

4. Resources

Browse the library of health education materials.

Viewing Options

- **Grid View** - Card layout showing resource previews
- **List View** - Compact list format

Toggle between views using the grid/list button.

Filtering Resources

- **Search** - Type keywords to find resources by title or description
- **Type Filter** - Filter by resource type (e.g., video, article, guide)
- **Tag Filter** - Filter by health categories

Resource Cards

Each resource displays:

- **Type** - The format of the resource
- **Title** - Resource name
- **Description** - Brief summary
- **Tags** - Health categories (tags matching your profile are highlighted)

Resource Actions

- **Bookmark** - Save to your bookmarks (stored locally)
- **Open** - Visit the external resource link
- **View Details** - See full resource information in a modal

5. Lab Results

Enter your lab test results to receive personalized resource recommendations.

Entering Results

1. Select a lab marker from the dropdown (e.g., Vitamin D, Glucose, TSH)
2. Enter your test value
3. Submit to save the result

How Matching Works

The app uses "logic rules" to match your lab values to health tags:

- Each lab marker has defined ranges (min/max values)
- When your result falls within a range, the associated tag is applied to your profile
- Resources with matching tags are recommended to you

6. Profile

Manage your account and preferences.

Personal Information

- Full Name
- Email (display only)
- Age

Health Goals

Select your primary health focus areas. These help personalize your experience.

Preferred Resource Types

Choose which formats you prefer (videos, articles, guides, etc.)

Notifications

- **In-App Notifications** - Alerts within the application

- **Email Updates** - Weekly summary of new resources

7. Admin Section

This section is for administrators managing the platform content.

Admin Tabs

Tab	Purpose
Resources	Create, edit, and delete educational resources
Resource Types	Manage the types/formats of resources
Lab Markers	Define lab tests that users can enter
Tags	Manage health category tags
Health Goals	Configure available health goals for user profiles
Criteria	Set up logic rules that match lab values to tags

Managing Resources

Creating a Resource

1. In the "Create New Resource" section, select a type
2. Enter the title
3. Optionally add a URL link
4. Select applicable tags
5. Click "Create"

Filtering Resources

Use the Filter Resources box to search by:

- Keyword (searches titles)
- Type (multi-select)
- Tags (multi-select)

Click "Clear Filters" to reset.

Managing Criteria (Logic Rules)

Criteria define how lab results map to tags. Each rule specifies:

Field	Description
Lab Marker	Which test this rule applies to
Min Value	Lower bound of the range (optional)
Max Value	Upper bound of the range (optional)
Tag to Apply	The tag assigned when the value matches

Example Rule

- **Marker:** Vitamin D
- **Min:** 0
- **Max:** 29
- **Tag:** "Low Vitamin D"

When a user enters a Vitamin D result of 25, they receive the "Low Vitamin D" tag, and resources with that tag are recommended.

8. Data Storage

What's Stored Locally (Browser)

- Dark/light mode preference
- Bookmarked resources

What's Stored in the Database

- Resources and their metadata
- Lab markers and logic rules
- Tags and resource types
- Health goals
- User-entered lab results

9. Tips

1. Enter accurate lab values - The recommendation system depends on correct data

2. Use bookmarks - Save resources you want to revisit

3. Check the dashboard - Personalized recommendations update as you add lab results

4. Try both view modes - Grid view for browsing, list view for scanning

10. Troubleshooting

Resources not loading

- Check your internet connection
- Refresh the page
- Clear browser cache if issues persist

Recommendations not appearing

- Ensure you've entered lab results
- Verify that logic rules exist for your markers (admin)
- Check that resources have matching tags (admin)

Dark mode not saving

- Ensure cookies/localStorage are enabled in your browser
